

Role: Vibration Specialist for Turbine Generators

Locations: Primarily USA, some international

Timing: Immediate

Positions available: (1)

Pay Rate: \$130-\$160 / Hour, Subcontractors (1099)

Other compensation: Overtime, Per Diem, and Sales Incentives for new clients

Company Info:

Independent Turbine Consulting is the largest USA-based independent provider of turbine-knowledgeable personnel, dedicated to providing highly-experienced personnel at reasonable and sustainable rates. We primarily supply personnel to OEM and Utility clients to support outages or supplement their in-house workforce during turbine outage planning and execution.

We provide our employees with generous compensation options, based on experience level, positive references, professional network strength, and proven value to clients. We also reward employees for identifying and helping bring in new projects. Our work is typically at power plants in the Central, Southern, Eastern, and Northern USA, as well as occasional assignments in Canada or South America.

Key responsibilities of the role include:

- Acquire vibration measurement data and analyze for machinery diagnostics
- Setup vibration acquisition equipment – data collection unit, cabling, independent probes as needed
- Interpret vibration data into actionable results – root causes of vibration, balance shot recommendations, etc.
- Direct installation of balance shots
- Documentation of findings with prompt and professional reports

Required experience and attributes:

- 5 + years experience as Turbine Vibration Engineer / Vibration Specialist
- Experience with GE, Siemens, and other OEM turbines and generators
- Reliable, High Energy self-starter
- Committed to safety and quality
- MUST HAVE LEGAL AUTHORIZATION TO WORK IN USA (US Citizen, work visa, etc.)

Desired Additional skills:

- Have own vibration equipment
- ST or GT Mechanical Field Engineer Experience, and/or OEM turbine FE / TFA training
- Influence coefficient resources for optimizing future balance shot effectiveness
- Good professional network (both technical, and clients)
- Additional languages – Spanish, etc.

Retirees and part-time workers are welcome. Apply today!
